

ANTI-RUST LUBRICANT SPRAY

Description

BENZOL® Anti Rust Lubricant Spray converts rust into a protective inert barrier. It prepares surface for top-coating with either enamel or acrylic paints. Convenient aerosol application for wide and even coverage. Black finish flexible primer is much more resistant to corrosion, and it ensures reliable performance under harsh environmental conditions.

Applications

BENZOL® Anti-rust Lubricant spray is suitable for automotive, industrial, household, and marine use. It protects and lubricates metal parts like bolts, hinges, tools, chains, and electrical terminals. It prevents rust, ensures smooth operation, and loosens frozen or corroded parts, making it ideal for a variety of uses under harsh conditions.

Direction to use

To use the rust converter and primer sealer, start by removing as much rust as possible - using a wire brush, sandpaper, or a grinder. Be sure to wear a dust mask, goggles and other appropriate PPE always through the project. The more rust you can remove here, the easier it will be to prepare the surface for painting.

Performance Benefits

- Prevents rust and corrosion on metal surfaces.
- Lubricates moving components for smoother operation
- Displaces moisture to protect in damp or humid conditions.
- Leaves a clean, non-sticky finish
- Loosens stuck parts, lubricates hard-to-reach areas
- Reduces friction and wear, extending part lifespan.
- Halt squeaks and remove tar and grease.

Product/Part Number

RR07000634 24x300

Technical Specifications

Tests	Results
Appearance	Aerosol
Odor	Fragrance
Color	Brown Transparent
Density at 15 °C, g/cm ³	0.68 ± 0.01
Drying Time, min	5 - 20
Adhesion on Metal	Excellent
Solubility	Insoluble in water

HEALTH AND SAFETY

This product is not expected to have adverse health implications when used for its intended application. For detailed information on safe handling of this product, refer to its Material Safety Data Sheet (MSDS).
